Academic freedom in New Haven and S'pore

BY SIMON CHEESEMAN

The ability to research and teach in such an environment should, however, be distinguished from the ability to organize protests on the street or to attack a university's rector or judge — although Singapore's laws on unlawful assembly and defamation are themselves the topic of on-going research.

Similarly, the removal of the British colonial problems on historical core subjects, such as colonialism, race and strait-jacketedness — and as a result the subject of little debate within academia and elsewhere.

The responsibilities associated with academic freedom include recognizing what is a legitimate justification for restrictions and then enforcing it. Professor — and all their students — profit from the collective environment that we have created.
